The other actions I would like to advocate are:

- √ Job creation
- √ SFN to endeavor in starting small business within the community
- √ Ensure adequate funding is available for our secondary graduates to pursue post-secondary education
- √ Create on the job mentoring opportunities for our young people to start building their capacity - training in positions such as bookkeeping, accounting, office management, administrative duties, coordinating and effective strategic planning.
- √ Training for our middle aged unemployed citizens in plumbing, electrical, furnace repair, etc.
- √ Ensure SFN has invested money in the right investments to ensure growth and security
- √ Negotiate a new mining agreement regarding royalty funding
- √ Work more with language and culture
- √ Language taught in daycare and schools
- √ More cultural activities for youth and young adults
- √ Log building training for SA recipients

George McGinty

Wolf Councilor Candidate

Traditional Values
Transparency &
Integrity

Let's work together to take care of our Land, People and Community

About Me

My name is George McGinty. I am of the wolf clan.

To tell you a little about myself, I am the son of the late Tommy McGinty. My dad was a memorable and honorable past hereditary chief of Selkirk First Nation. My mother is Annie McGinty. My family lines through her connect to the Northwest Territories. Her mother, Frances, was from Fort McPherson. From my parents, I was taught how to respect and care for the land and the people. I was taught how to trap, fish and hunt from my dad and uncles. In my early adult years I was quite a good ball player; they called me "Scooping George". Now I teach my nieces and nephews to play baseball and hockey.

In the 1980's I took a log building training course. We built the beautiful cookhouse now at Fort Selkirk. I worked on many areas of our traditional land, including but not limited to, Tatlaman Lake, Little John Slough and Kalzas Creek. I have always maintained a strong embedded work ethic and enjoyed working on the land. I have worked for the RRC committee for 2 years. For me, the best time of the year is hunting season and embracing our traditional lifestyle. I love being on the land and taking great value of the beauty of our SFN country. We need to take care of and protect our land and waters

My Perspective Vision

That is why I want to contribute to our First Nation. I feel a strong need to help my people that are in need of help from dealing with addiction issues. Wellness and the healing of our people is imperative for the well-being and sustainability of our nation. We need to work collectively and focus on strengthening the capacity of our citizens.

I would like to see a priority to find a solution for our lower income citizens. We need work opportunities for the Social Assistance recipients to create training and employment for log building and small home construction to address the need of housing, employment, capacity and skill building.

Our Elders are the backbone of our nation - they carry the knowledge, history, culture and identity of our people. Let's start utilizing our Elders in storytelling, sewing programs, Elder in the class language program within the daycare and school.
